Summary

Hey, I'm Vehan! I'm a 19-year-old self-taught software developer.
I began my coding journey in 2020, starting with JavaScript and
Python as a full-stack developer. Now, I'm diving into mobile app
development with Flutter. I also share my journey and knowledge
with over 70k followers on my Instagram page. Let's connect and
explore the world of tech together!

Experience

FlitLabs
Founder
January 2022 - Present (2 years 3 months)
Sri Lanka

Developed a driver-side application for a UK-based car rental service. The
app incorporates essential features like off-request management, job tracking,
profile management, and earning tracking. Utilizing Flutter for the frontend and
seamlessly integrating with a REST API backend, this application ensures a
streamlined and user-friendly experience for drivers

Developed a Salon Management Merchant App featuring user-friendly
functionalities like appointment scheduling, daily shift management,
service tracking, and shop management. The app's frontend, built with
Flutter, seamlessly integrates with a REST API backend, ensuring smooth
communication and efficient data handling. This collaborative effort results in
a powerful tool for salon merchants, optimizing their business processes while
providing a seamless and responsive user experience

Donext
IT Consultant and Mobile Application Engineer
January 2024 - Present (3 months)
Sri Lanka

Code94 Labs

1 year 1 month

Associate Software Engineer
October 2023 - Present (6 months)
Sri Lanka

Software Engineer
March 2023 - October 2023 (8 months)
Sri Lanka

Designed and developed a Doctor Channeling Management App, enabling users to track medicines, doctor visits, and appointments. The app was built using Flutter for the front-end and Python for the backend, providing a robust healthcare solution for efficient management

Built a mobile app with Flutter, complete with backend REST API integration, for a property management platform. The app enables users to view properties on a map, post advertisements, and boost listings for enhanced visibility.

Developed a user interface using Flutter for a Near Field Communication(NFC) enabled social dating/meeting/connectivity platform
